

We Build What You Need.

Home Extensions

Need an extra room? An energy efficient and economical Altec home extension may be the answer.

Using insulated (composite) roofing brands, Altec can build an extra rumpus, family or entertainment room. With a combination of insulated wall and powdercoating windows, we can create an extension to suit your whole family and comply with the relevant energy efficiency rating.

Your Altec Design Consultant can also discuss with you the importance of retaining head height, energy efficiency regulations and boundary clearance regulations applicable to your proposed extension.

Home Extension Features/Benefits

- Insulated 75mm thick roof with engineer-certified 1 degree fall for increased head height
- Trafficable roof for gutter maintenance
- Maintenance free internal ceiling
- Large colour range of gutters to co-ordinate with your existing home
- Insulated wall panels with a variety of finishes (e.g., colorbond steel, ply, gyprock, etc) on both inside and outside
- Quality powdercoated aluminium windows
- Maintenance free!
- Council approval
- 10yr Workmanship Guarantees
- Pre building site inspection by Construction Supervisor
